

Answer all the questions: $(5 \times 1 = 5)$

- Q1 (i) Define Latching current and Holding current
(ii) What is Voltage Clamping device? Give some example.
(iii) What are the advantages of using a free wheeling diode in a rectifier circuit?
(iv) Define storage time of power BJT?
(v) What do you mean by duty cycle?
(vi) Draw V-I characteristics of a thyristor?

2Q. What are the modes of operation of SCR? Explain (2.5)

3Q. Describe single phase full-wave controllable converter circuit for R-L load with necessary circuit diagram? (2.5)

Samantha Chaitanya Sekhar Institute of Technology and management

INTERNAL EXAM : 2

SEM : 5TH

SUB : PE & PLC

FULL MARK : 10

Answered all the question

(5 × 1 = 5)

Q1 (i) Define Inverter.

(ii) Define chopper.

(iii) What is rise time?

(iv) What is latching current?

(v) What is the function of buck converter?

(2.5)

Q2 Explain in detail about the speed control of synchronous motor by power electronic drive.

(2.5)

Q3 Explain in brief about buck boost converter.
